PROFESSIONAL SUMMARY

Passionate Full Stack Developer with experience building responsive, scalable, and user-friendly web applications. Skilled in frontend and backend development, with a strong foundation in DSA. Continuously improving my craft, with a strong interest in AI/ML and exploring emerging AI tools to build innovative and impactful software solutions.

SKILLS

Languages: Java, Javascript, Typescript, SQL

Frontend: HTML5, CSS3, Tailwind CSS, ReactJS, NextJS

Backend: NodeJS, ExpressJS, PostgreSQL

Tools: Git, Github, VS Code, Vercel

AI Tools: ChatGPT, Claude, Github Copilot, Antigravity

PROJECTS

1. Hardware Shop Inventory System

Tech Stack: React.js, Node.js, Electron, SQLite, JWT, REST APIs

Hardware Shop Inventory Management System is a comprehensive desktop application built with Electron, React, and Node.js/Express designed to streamline inventory management for hardware shops. The system features full inventory tracking with CRUD operations, secure authentication, PDF report generation, and SQLite-based local database storage. It operates as a standalone Windows executable (.exe) with built-in auto-update functionality, allowing users to manage stock levels, pricing, and business operations offline without internet dependency.

- Github repo: <https://github.com/Meetlodariya254/hardware-shop-ims.git>

2. EventFlow — AI Event Scheduler

Tech Stack: React.js, Vite, Node.js, Twilio API, Firebase Cloud

EventFlow is an intelligent event-scheduling web app built with React and Vite that automates reminders via WhatsApp. When messages fail or go undelivered, it triggers AI-driven voice-call fallbacks using Twilio to ensure attendees are reached. The JavaScript front end includes responsive UI, message templating, and retry/escalation logic to provide reliable, production-ready notifications.

3. Luxury Photography Studio Portfolio

Tech Stack: Three.js, GSAP, Vite, VanillaJS

Luxury Studio Showcase is an ultra-premium, interactive 3D web portfolio designed for high-end photography studios. It features WebGL 3D interactions powered by Three.js, smooth micro-animations with GSAP, and an editorial design inspired by luxury fashion magazines. Built with vanilla JavaScript, HTML5, and CSS3 using Vite for optimal performance, the platform includes responsive design and WhatsApp lead generation integration to drive client bookings.
